

# **Operating Manual for Hands-Free Floor Mount Stainless Steel Sink**

AC Models 524A and 524A-0.5 Battery Models 524B and 524B-0.5

SINK WITH ELECTRONIC SENSOR

AC OR BATTERY POWERED

1

Columbia does not recommend use with harsh chemicals.

**Product Compliance** NSF/ANSI 2 Food Equipment, NSF/ANSI 372 Lead-Free Compliant, ASME A112.18.1

## Parts List

(1) Floor mount sink
(1) Leg assembly set
(6) Nuts, bolts and washers for leg assembly
(4) Nuts and washers for connecting sink to leg assembly
(1) AC or Battery powered sensor faucet assembly
(1) Mixing check valve
(1) Strainer assembly with basket

#### Installation Instructions

#### Step 1

- 1. Attach upper and lower leg support brackets to legs with hardware (provided).
- 2. Place wash station sink on leg assembly and secure with hardware (provided).
- 3. Establish sink location.
- 4. Mark the floor where the four holes are at the base as shown in illustration A.
- 5. Drill holes as required for mounting hardware. (Hardware not included).

#### Step 2

- 1. Install strainer assembly.
- 2. Install faucets to the sink following the instructions provided with sensor unit.
- 3. Attach supply tube with elbow to back of faucet.
- 4. Install mixing check valve and compression fitting to control box of each sensor faucet.

#### Step 3

- 1. Secure wash station to floor.
- 2. Connect waste line to strainer assembly (s).
- 3. Mount sensor control boxes at desired location on wall.
- 4. Connect power line from sensor to control box.
- 5. Attach supply tube from faucet to control box.
- 6. Connect hot and cold water from the source to mixing check valve (s).
- 7. Remove aerator from the spout assemblies and flush water system. (see step 7 sensor installation instructions)
- 8. Check connections for leaks.
- 9. Replace aerator onto the spout (s).

#### Step 4

- 1. Seal gap between bowl and leg assembly as shown in illustration B.
- 2. We recommend sealing top of backsplash to wall if applicable as shown in illustration C.

# SINK WITH ELECTRONIC SENSOR

## AC OR BATTERY POWERED

2

#### **Tools Required**

Tape measure
Adjustable wrench
Drill motor and drill bits
Pipe wrench
Level
Safety glasses
Screw drivers: phillips and standard
Pencil
Socket wrench

Notice for California Consumers

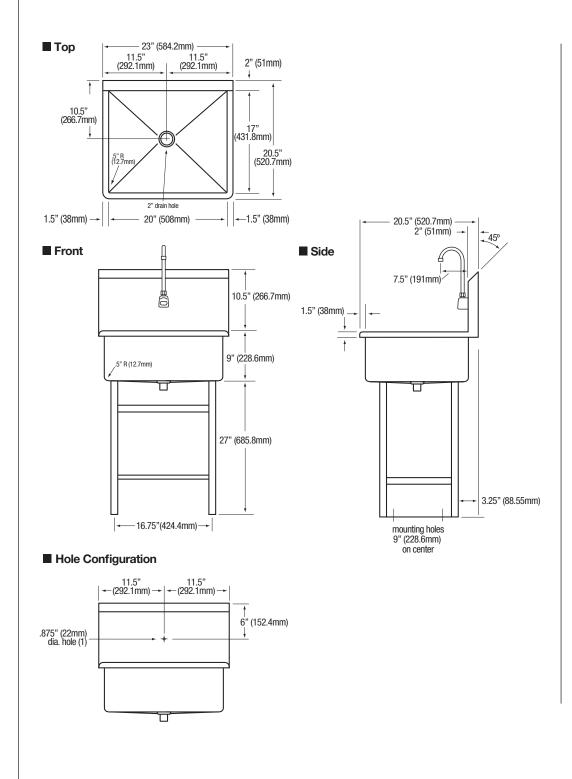

WARNING: This product can expose you to chemicals including Chromium (hexavalent compounds), Lead, and Phthalates (DEHP) which are known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov.

NOTE: Lead content originates from Brass components in valves and faucets and is certified under NSF/ANSI 372 as containing less than 0.25% lead in wetted surfaces.

## CARE AND MAINTENANCE

5

#### **Care and Maintenance**

Regular cleaning will preserve the appearance and integrity of the surface. Stainless steel can easily be cleaned and kept stain-free using various methods.

#### **Recommendations:**

- Clean with an abrasive cleaner like, Bon-Ami or Zud weekly or bi-weekly. Always scrub in the direction of the grain or polish lines. Another option is to use Baking soda. Make sure to rinse well and dry. Illustration A
- Most soaps and detergents contain chlorides, we recommend rinsing the stainless-steel sink with hot water after use, to prevent corrosion. Illustration B
- Regularly dry your sink to prevent water and surface rust marks. Illustration C
- Do not leave salt in the sink or near a saltwater environment.
- Use a quality stainless steel cleaner and follow cleaner instructions. Wipe along the grain (NOT against). Illustration D

#### Things to Avoid:

- · Avoid harsh abrasive cleaners and corrosive chemicals.
- Avoid abrasive scouring pads, carbon steel brushes and steel wool for cleaning as iron particles left behind can lead to rust.
- Avoid the use of oily rags or greasy cloths when wiping the surface. To avoid water spots, wipe dry after use.

#### Additional Tips:

- Regularly drying your sink works wonders to prevent water and surface rust marks.
- Wear rubber gloves when working with cleaners to protect your hands.
- Never mix cleaners. Some products react to create dangerous gases.
- There are thousands of blended or compound cleaners on the market. Users are advised to contact suppliers of solvents for information on their applications on stainless steel.
- · DO NOT USE SOLVENTS in closed spaces or while smoking.
- Note: Columbia does not recommend use with harsh chemicals.

# SANI-LAV Sensor Faucets

Wall Mounted AC and Battery Powered Meets ANSI/ASME A112.18.1 M-1989

## **Operation**

- 1. A continuous, invisible beam is emitted from the sensor.
- 2. The faucet is activated by placing hands under the spout within the effective range of the beam. Water starts to flow immediately for as long as the user's hands remain in the sensor range.
- 3. When hands are removed, the water flow stops. The sensor will automatically reset and be ready for the next user.

Solid brass, chrome plated

2 minute run every 12 hours

30. or 60 seconds

Preset and adjustable

Armored, vandal resistant

6V DC, normally closed

or 24 hours

Solid state, AC or battery, switchable

Preset at 20 seconds and adjustable to 10,

Presets and adjustable from 1-8 seconds

2.0 or 0.5 GPM, Laminar Flow Control

Input AC 120V 60 Hz or 220V

Output DC 12V, 0.8A/Class 2

Input AC 120V, Output DC 12V, 3A

400,000 on/off cycles, up to 4 years

Armored, vandal resistant Serves up to 8 faucets

(4) AA Alkaline Batteries

4. In the battery powered version, a flashing red light will indicate a low battery condition.

#### **Specifications Faucet Construction**

#### **Control Circuit**

- Auto Time-out

- Line Purge (request only)
- 60, 120, 180 seconds - Scrub Mode Delay (request only)
- Sensor Range
- Shut-off Delay

- Wattage: 0.4W (idle), 5W (in use)
- Operating Pressure: 5 psi to 125 psi

Flow Control

## AC Mode

**Power Adapter** 

- Standard Plug-in - (UL/CSA) Power Cable

- Optional Multi-Unit Adapter
- (UL/CSA)
- **Battery Mode**

Battery Powered Models **Battery Service Life** 

#### **Package Includes**

(1) Faucet with electronic sensor

- (1) Control box w/6V DC solenoid
- (1) 12V DC plug-in power adaptor (H-6700C, -DC, -LR and -LRDC only)
- (1) In-line filter with clean-out trap
- (1) 18" Flex, S.S. supply tube, 3/8"(1) 6" Gooseneck Spout
- (1) Mounting hardware
- (1) 2.0 GPM Flow Control(4) AA Alkaline batteries (HB-6700C, -DC, -LR, -LRDC only)
- (1) Battery holder (HB-6700C, -DC, -LR, -LRDC only)

| ESB2RL-0.5 | Battery Powered | Low-Flow 0.5 GPM |

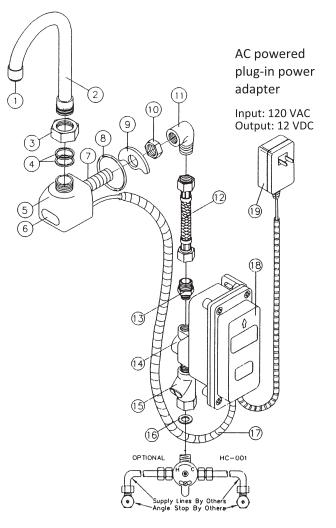

DC Powered Sensor Operated Mixing Faucet Installation Instructions

- 1. Prior to installation, thoroughly flush all water lines and replace stop washers, if required.
- To ensure proper operation, "DRY TEST" the faucet by plugging the Sensor Eye Cable (17) into the matching connector on the PC board inside of the Control Box (18).
  - a. **AC Powered:** Connect the *Power Adapter (19)* to the PC board inside of the *Control Box (18)*, then plug the Power Adapter into a 120 V AC wall outlet. Place your hand in front of the sensor eye and listen for a clicking sound. If there is no clicking sound, call the factory.
  - b. Battery Powered: Properly install new batteries into the battery holder and ensure the battery holder is connected to the PC board. Place your hand in front of the sensor eye and listen for a clicking sound. If there is no clicking sound, call the factory.
- 3. After a successful "DRY TEST", unplug the *Sensor Eye Cable (17)* and *Power Adapter (19)* or battery holder from the PC board.
- Loosen Flow Control Device (1) and assemble the Gooseneck Spout (2) using the Split Washers (4) and Spout Nut (3). Mount the Gooseneck Spout (2) onto the Body (5). Feed the Sensor Eye Cable (17) through the sink wall and tighten the faucet onto the sink using the O-Ring (8), Washer (9), and Mounting Nut (10). Attach the 90-Degree Elbow (11) to the Supply Rod (7). USE TEFLON TAPE ONLY, NO PIPE DOPE
- Reconnect the Sensor Eye Cable (17) and Power Adapter (19) connections described in STEP #2, making sure the cables are seating in the Control Box (18) housing properly.
- Attach the *Compression Fitting (13)* to the *Solenoid Valve (14)* and connect it to the *Elbow (11)* using the *Supply Tube (12)*. Insert the *Nylon Washer (16)* into the swivel nut located on the *In-Line Filter (15)*.
  - a. **Pre-tempered or cold water only:** Use a union fitting (not supplied) to connect the supply line (not supplied) from the supply stop to the *In-Line Filter (15).*
  - b. Tempered water: Attach an optional Hydrotek *HC-001* or *HC-003* mixing valveto the *In-Line Filter (15)*. Connect the supply lines (not supplied) to the mixing valve.
- 7. Turn on water and check for leaks. Plug the *Power Adapter (19)* into a 120V AC outlet (for AC Powered). Push the reset button on the PC Board. Reinstall the cover for the *Control Box (18)* and tighten screws to ensure water resistance. Place hands in front of the sensor eye to activate water flow. Remove hands and the water should stop. If not, refer to the troubleshooting guide or call the factory.
- 8. Periodically clean the filter element located inside the *In-Line Filter* (15).
- 9. For minor adjustments, refer to the instructions located inside the cover of the *Control Box (18)*.
- 10. **IMPORTANT:** The stop valve should never be opened to the point where the water flow exceeds the flow capability of the fixture. The fixture must be able to accommodate the continuous water flow from the faucet in the event of a failure. Should the fixture overflow due to water exceeding the capability of the fixture and/or the drain pipe, Hydrotek will not be responsible for any damages.

## **Parts:**

- 1. Flow Control Device
- 2. Gooseneck Spout
- 3. Spout Nut
- 4. Split Washer
- 5. Body
- 6. LED Sensor Cover
- 7. Supply Rod
- 8. O-Ring
- 9. Washer
- 18. Control Box
- 19. Power Adapter

11. 90 Degree Elbow

13. Compression Fitting

12. Supply Tube

14. Solenoid Valve

15. In-Line Filter

16. Nylon Washer

17. Sensor Eye Cable

10. Mounting Nut

## HYDROTEK INTERNATIONAL, INC.

Sensor Operated Mixing Faucet
Troubleshooting Guide

Normal Operation: When power is connected, the faucet will immediately perform diagnostic function. You will hear a clicking sound and see lights flash. When the user's hands are placed under the spout, the light will flash once and water will start to flow. Water flow will stop when hands are removed. The red indicator light will flash when the batteries are low.

Turn the manual handle clockwise to increase temperature and counter-clockwise to decrease.

| Problem                                              | Possible Cause                                                                                                                                                                                                                                               | To Diagnose                                                                                    | Remedy                                                   |

**IMPORTANT:** Periodic maintenance is required for smooth and trouble-free operation of this faucet.

For service and inquiry about available repair kits, please call Hydrotek Technical Support at (800) 922-9883.

## **Care and Cleaning Instructions:**

- WARNING! Using abrasive or chemical cleaners *will* damage the chrome or decorative finishes.
- Use only soap and water to clean the finish, then wipe dry with a clean cloth.
- If chemical cleaners are used for other parts of the lavatory, ensure that the faucet is protected from potential contact from those cleaners.

Sensor Operated Mixing Faucet Solenoid Valve Cleaning

1. Turn off water supply at stop valve.

2. Remove control box (if possible) to gain access to the solenoid valve.

3. Remove four Screws (#1) and separate the valve from the box.

4. Remove four Coil Screws (#2) and separate Coil (#3) from Valve Seat (#4).

5. Clean or replace Control Disc (#5), Disc Spring (#6), Piston, Piston Spring, and check the Piston Sleeve for corrosion.

6. Re-install all parts in same order as the diagram below.

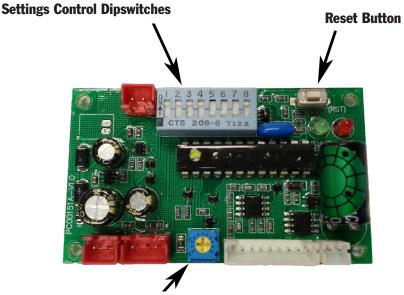

7. Re-install solenoid on the control box and remount box in water line. 8. Check and clean Filter Screen (#24) in Filter Body (#22).

9. Reset P.C. Board and make sure solenoid clicks open and thumps closed.

10. Turn on water and check for leaks and proper operation.
