

ARMOR GUYS
• PROTECTED •

After years of intense research on GRAPHENE, a major breakthrough has been made with the development of GRAPHENE-based special textile fibers. The advent of Armor Guys Inc. GRAPHENE based range of protective gloves, a dramatic change in hand, arm and body protection for generations to come is on the horizon.

GRAPHENE is a nano-sized carbon material that is the most important and leading edge material on earth and possesses inherent properties beyond imagination. The density of GRAPHENE is harder than a diamond, 200 times stronger than steel and is the strongest material ever measured in the world. It has outstanding thermal conductivity at 130 GPa and has a breaking tenacity that reaches 42N/m while the density is only 2.2g/cm.

When introducing GRAPHENE to a variety of textile fibers, the characteristics of those fibers show superior performance, nothing like anything that has ever been seen. GRAPHENE based gloves have incredibly high tensile strength, offer superior cut, abrasion and heat resistance. At the same time, GRAPHENE possesses anti-aging, anti-bacterial, anti-static, and anti-ultraviolet properties.

Armor Guys Inc. would like to introduce our newest range of high performance gloves, Kyorene, which is made from our proprietary GRAPHENE based special fibers. Lightweight, comfortable, soft, flexible, and extremely strong, Kyorene is THE next generation material that will substantially change and enhance the properties of hand protection as it is known today. Armor Guys will continue to be at the forefront of this innovation as THE leading player in the introduction of GRAPHENE to the market for high quality hand, arm and body protection. GRAPHENE will dramatically change the safety standards that are up held in the market today. Accept no substitute when it comes to GRAPHENE based hand, arm and body protection. The only glove company in the world with years of R&D behind GRAPHENE and the only glove manufacturer vertically integrated in the production of GRAPHENE from raw material to finished product.

APPLICATIONS GRAPHENE WILL TRANSFORM

Stronger Safety Gear for Workers

Gloves
Helmets
Glasses
Safety Vest
Safety Jackets

Anti-Bacterial Products

Medical Gloves
Medical Equipment
Beddings
Toothbrush
Towel

Water Filtration

Household Water Filter
Industrial Water Filtration System

Military Technology

Aircraft Production
Bullet Proof Vest
Stronger and Lighter Gear
Information Transfer
Bio Medical Research

Super Charged Batteries

Electric Cars
Smart Phones
Laptops

More High Performance Products

Tires
Air Bags
Rugs
Wigs

KYORENE
THE GRAPHENE FIBER

KYORENE® by ARMOR GUYS

After years of research and development, Armor Guys is proud to bring to the Industrial Safety Market a revolutionary in-house and patented technology, never used before for a safety glove. It's called Kyorene®, and it's made of the thinnest and strongest material on earth: GRAPHENE.

GRAPHENE TESTING PROPERTIES:

ODOR NEUTRALIZING

BACTERIO-STATIC

UV PROTECTION

THERMAL REGULATION

Also FDA 21 CFR Compliant, Reach Compliant and Oeko-Tex Certified

TESTING PARTNERS:

Intertek

TUV

CTC

The density of GRAPHENE is harder than a diamond, it is 200 times stronger than steel and is the strongest material ever measure in the world.
