SPIGOT TIGHTENING INSTRUCTIONS

1 | Unpack the spigot, gaskets, and nut.

2 | Remove the platform from inside the brewer.

3 | Place one washer on the spigot and insert the thread end through the hole in the brewer with the spout pointing to the right, parallel to the base of the brewer.

4 | Reach inside the brewer and place the other washer on the spigot end.

5 | Tighten the nut until finger-tight. (Do not overtighten.)

6 | While holding the nut with one hand and the spigot with the other, rotate the spigot one-quarter turn to the right until the spout points down.
