

TrueZone™

True cleanliness...**True** efficiency...**True** savings.

TrueZone™ takes ice machine maintenance to the next level with 24/7 **Photoplasma™** technology! Delivering clean ice, extending the life of the machine and improving hygiene, efficiency, and sustainability for your business!

24/7 AUTO CLEANING

Reduces cleaning frequency up to 75%*

UNBEATABLE HYGIENE

Food safety protection. Inhibits bacteria, mold, and biofilm.

COST SAVINGS

Reduces cleaning downtime and only annual UV lamp replacement needed.

Photoplasma™ technology

Combines negative ions, UV light, ozone, and hydroxyl radicals to sanitize every surface and air pathway inside the machine. Creates a closed-loop system that continuously inhibits slime, mold, and bacteria growth.

*Ice machine still requires routine cleaning; however, this is significantly reduced.
