

How to Use

1. Remove and expose the active mound or tunnel. Peel back the lawn to preserve it for use after catching the gopher.
2. Remove just enough dirt to fit the trap. For best results, position two traps back to back.
3. Set the trap by using two thumbs or by stepping on the set lever until it clicks into place.
4. Place the traps in the tunnel. Trap opening must be level with the bottom of the tunnel.
5. Cover the trap with loose soil so it appears as if it is part of the runway.
6. After the trap has fired, remove the gopher if desired.
