

DURABLE CLEAR POLYCARBONATE
IS PRACTICALLY INDESTRUCTIBLE

Ice Totes

Efficient, Labor Saving & Sanitary

If there are more than 100 steps between your ice machine and ice stations throughout your establishment, these systems are for you. Vigor's efficient ice transport systems save operators time, energy, and labor costs.

Transportation Sets

Large Capacity

The dolly systems come with either 4 square or 4 round Vigor ice totes for transporting up to approximately 100 lbs. of ice. For transporting even more ice at a time, the Vigor cart transport system has (2) durable 16-gauge 403 stainless steel shelves to transport up to 8 Vigor square ice totes, totaling approximately 200 lbs. of ice.

Easy Transport

These systems cut out the physical labor associated with carrying heavy ice totes far distances which reduces the chance of a workplace injury and saves time and energy. Both systems feature smooth non-marking casters.

Item #	Capacity	Description
247ICEB22D4K	100 lb.	4 Square Ice Totes and Aluminum Dolly
247ICEB6DK4	100 lb.	4 Round Ice Totes and Aluminum Dolly
247ICEB22C8K	200 lb.	8 Square Ice Totes and Stainless Steel Cart

Ice Totes

Included lid ensures your ice isn't contaminated during transport

Virtually unbreakable clear polycarbonate construction for durability, longevity, and visibility of ice levels

Bottom section of hanger offers convenience of hanging tote upside down for sanitary drying. It also doubles as a base handle for controlled pouring

Round Ice Tote

6 Gallon, 25 lb. Capacity

Integrated rust-resistant carrying handle with ergonomic grip for comfortable transporting

Blue-tinted, transparent material with "For Ice Only" label to remind staff of designated use and easily see contents

Unique filling hanger design allows bucket to rest on the ice machine for easy, hands-free filling
