

GH PUQpress Warranty

PUQpress is covered under a 2 year parts warranty supported by GHGBS

The active part of the product is the drive unit. It does all the heavy labor for you and can eventually wear out. If it does, it is very easy to replace. As long as the number of tamps your product performed didn't cross the warranty number, your drive unit is covered. All other parts are covered as well.

The end user should contact the point of purchase. And the issue can then be reported to GH Grinding & Brewing Solutions.

We will need:

1. Number of tamps
2. The serial number and model of the unit.
