

January 23, 2019

Renkert Oil produces Renoil 70-W, a food grade white oil that meets NF / FDA 21CFR178.3620(a) and 21CFR172.878 requirements. As shown on each Certificate of analysis Renoil 70-W USP food grade white oil meets or exceeds these standards.

Renoil 70-W also is NSF registered for a variety of uses in the food industry(3H, H1, HX-1) Renoil 70-W, as well as the rest of our food grade mineral oil line, is odorless, tasteless and considered harmless to human health.

Renoil 70-W is certified Kosher and Halal. It is registered with REACH. White mineral oil is generally regarded as safe. Renkert uses a date based lot code yymmdd – example:

**Lot 180122**

January 22, 2018

Renkert Oil guarantees that our white mineral oil products as of the date of shipment or delivery to be not adulterated or misbranded within the meaning of the Federal Food, Drug and Cosmetic Act. Further these products are not prohibited to be introduced into interstate commerce under the provisions of section 404, 505 or 512 of the act.

Renoil 70-W is produced from virgin mineral oils and have no contact with nuts or gluten or other potentially allergenic materials either in production, storage or transport. No GMO materials come in contact in production handling or storage. Further no contact with animal products precludes any contact with BSE/TSE.

Renkert Oil operates per Good Manufacturing Practices, and an ISO compliant process. We perform annual independent audits of our facilities. HACCP analysis is conducted annually. Although mineral oil will not support microorganisms, we test regularly to prove a lack of microbiological contamination.

A safe shelf life is 5 years, but this can be impacted by contact with oxygen, sunlight and high temperatures. Room temperature storage is ideal.

Mineral oil is a direct food contact material. The FDA Food Safety / bioterrorism requirements are covered by our compliance with FSMA and our SQF certification (global food safety independent certification). Renkert Oil manages its dedicated facilities to protect the integrity of our USP white mineral oils and prevent adulteration.

# RENOIL™ WHITE MINERAL OILS

## CUSTOMER BENEFITS

Renoil White Oils deliver value through:

- **A high degree of purity** — Colorless, odorless, tasteless. The purity of Renoil White Oils accounts for their frequent use in medicinal and cosmetic products. The low phytotoxicity of Renoil White Oils can make them a preferred component of products applied to agricultural and ornamental plants.
- **A wide application range** — Renoil White Oils are common ingredients of pharmaceuticals and cosmetics. The plastics, textile and food industries are major users of Renoil White Oils.

## FEATURES

Renoil White Oils are colorless, odorless, tasteless mixtures of saturated paraffinic and naphthenic hydrocarbons that span a viscosity range of 60-550 SUS at 100°F.

These nearly chemically inert oils are virtually free of nitrogen, sulfur, oxygen and aromatic hydrocarbons.

Renoil White Oils contain Vitamin E, a natural antioxidant, to protect quality during handling and storage.

They are clear, bright and free of solids and water.

## APPLICATIONS

Renoil White Oils find wide application:

- where direct food contact may occur
- where prolonged contact with human skin is necessary
- where odor and staining must be minimized
- where outstanding long service under adverse conditions is required

Renoil White Oils must be stored in approved containers to prevent contamination that could jeopardize their food grade status.

Renoil White Oils:

- meet or exceed **U.S. Food and Drug Administration (FDA)** requirements
  - for direct use in food, 21 CFR 172.878
  - for applications where incidental food contact may occur, 21 CFR 178.3570
  - for use in animal feed, 21 CFR 573.680
  - for use as technical white oils, 21 CFR 178.3620(b)
  - for use as a plasticizer in polymeric substances, 21 CFR 178.3740
- meet all **U.S. Pharmacopeia (USP)** requirements for mineral oils
- meet all **Cosmetic, Toiletry, and Fragrance Association (CTFA)** requirements for white mineral oils
- meet all **Canadian Food Inspection Agency (CFIA)** requirements for white mineral oils
- are certified by **NSF** and are acceptable as lubricants where incidental food contact may occur (H1) in and around food processing areas and as a release agent (3H) where direct food contact may occur. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements of appropriate use, ingredient review and labeling verification.
- are certified **Kosher, Pareve** and **Halal**.
- all European Pharmacopeia (EP) requirements for mineral oils

**Safety Data Sheet**  
**Light Renoil White Oils**  
SDS Revision Date: 3/24/2015

## 1. Identification of the substance/mixture and of the company

### 1.1. Product Identifier

**Product Identity**

Renoil DCO, Renoil 60-W, Renoil 70-W,  
Renoil 80-W, Renoil 90-W, Renoil 100-W

**Alternate Names**

White mineral oil

### 1.2. Relevant identified uses of the substance or mixture and uses advised against

**Intended use**

Lubricant, personal care, food process oil

**Application Method**

Varied

## 2. Hazard identification of the product

### 2.1. Classification of the substance or mixture

H304 – Aspiration Hazard – Category 1

Other Hazards: none known

### 2.2. Label elements

**DANGER**

May be fatal if swallowed and enters airways  
IF SWALLOWED: Immediately call a POISON CENTE  
or doctor/physician; Do NOT induce vomiting; Dispose  
of contents/container to approved disposal facility

**[Prevention]:**

No GHS prevention statements

**[Response]:**

No GHS response statements

**[Storage]:**

No GHS storage statements

**[Disposal]:**

No GHS disposal statements

### 3. Composition/information on ingredients

This product contains the following substances that present a hazard within the meaning of the relevant State and Federal Hazardous Substances regulations. This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

| Ingredient/Chemical Designations           | Weight % | GHS Classification | Notes |
|--------------------------------------------|----------|--------------------|-------|
| White mineral oil<br>CAS Number: 8042-47-5 | 100      |                    | [1]   |

[1] Substance classified with a health or environmental hazard.

### 4. First aid measures

#### 4.1. Description of first aid measures

|                   |                                                                                                                                                                                                                                                                                                                                                     |
|-------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>General</b>    | In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person.                                                                                                                                                                                                                     |
| <b>Inhalation</b> | Remove to fresh air, keep patient warm and at rest. If breathing is irregular or stopped, give artificial respiration. If unconscious place in the recovery position and obtain immediate medical attention. Give nothing by mouth.                                                                                                                 |
| <b>Eyes</b>       | Immediately flush the eyes with large amounts of water for at least 15 minutes, alternately lifting the upper and lower eyelids. After 5 minutes, if appropriate, remove contact lenses and continue flushing the eyes for an additional 15 minutes. Not expected to cause prolonged or significant eye irritation.                                 |
| <b>Skin</b>       | Remove contaminated clothing. Wash skin thoroughly with soap and water or use a recognized skin cleanser. Contact with the skin is not expected to cause prolonged or significant irritation. Contact with the skin is not expected to cause an allergic skin response. Not expected to be harmful to internal organs if absorbed through the skin. |
| <b>Ingestion</b>  | Not expected to be harmful if swallowed. Do NOT induce vomiting.                                                                                                                                                                                                                                                                                    |

#### 4.2. Most important symptoms and effects, both acute and delayed

|                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Overview</b> | <b>Most important symptoms and effects, both acute and delayed:</b> Inhalation of oil mists or vapors generated at elevated temperatures may cause respiratory irritation. Accidental ingestion can result in minor irritation of the digestive tract, nausea and diarrhea.<br><b>Notes to Physician:</b> Acute aspirations of large amounts of oil-laden material may produce a serious aspiration pneumonia.<br>Patients who aspirate these oils should be followed for the development of long-term sequelae. Inhalation exposure to oil mists below current workplace exposure limits is unlikely to cause pulmonary abnormalities. |
|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## 5. Fire-fighting measures

**NFPA 704 Hazard Class**

**Health: 0 Flammability: 1 Instability: 0**

0 (Minimal)  
1 (Slight)  
2 (Moderate)  
3 (Serious)  
4 (Severe)

### 5.1. Extinguishing media

Recommended extinguishing media; alcohol resistant foam, CO<sub>2</sub>, powder, water spray.  
Do not use; water jet.

### 5.2. Special hazards arising from the substance or mixture

Hazardous decomposition: Highly dependent on combustion conditions. A complex mixture of airborne solids, liquids and gases including carbon monoxide, carbon dioxide and unidentified organic compounds will be evolved when this material undergoes combustion

### 5.3. Advice for fire-fighters

Firefighting personnel should respond with appropriate protective clothing, firefighting gear, and breathing equipment as trained. All other personnel should exit the area and proceed to a gathering point in an area unaffected by the fire and smoke.

See Section 9 for Flammable Properties including Flash Point and Flammable (Explosive) Limits

**ERG Guide No.** 128

## 6. Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

Put on appropriate personal protective equipment (see section 8).

### 6.2. Environmental precautions

Do not allow spills to enter drains or waterways.

Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse.

### 6.3. Methods and material for containment and cleaning up

**Protective Measures:** Eliminate all sources of ignition in vicinity of spilled material.

**Spill Management:** Stop the source of the release if you can do it without risk. Contain release to prevent further contamination of soil, surface water or groundwater. Clean up spill as soon as possible, observing precautions in Exposure Controls/Personal Protection. Use appropriate techniques such as applying non-combustible absorbent materials or pumping. Where feasible and appropriate, remove contaminated soil. Place contaminated materials in disposable containers and dispose of in a manner consistent with applicable regulations.

**Reporting:** Report spills to local authorities as appropriate or required.

## 7. Handling and storage

### 7.1. Precautions for safe handling

Keep away from flames and hot surfaces. Use good personal hygiene practices and wear appropriate personal protective equipment. Spills will produce very slippery surfaces.

### 7.2. Conditions for safe storage, including any incompatibilities

Avoid contaminating soil or releasing this material into sewage and drainage systems and bodies of water.

**Static Hazard:** Electrostatic charge may accumulate and create a hazardous condition when handling this material. To minimize this hazard, bonding and grounding may be necessary but may not, by themselves, be sufficient. Review all operations which have the potential of generating and accumulating an electrostatic charge and/or a flammable atmosphere (including tank and container filling, splash filling, tank cleaning, sampling, gauging, switch loading, filtering, mixing, agitation, and vacuum truck operations) and use appropriate mitigating procedures. For more information, refer to OSHA Standard 29 CFR 1910.106, 'Flammable and Combustible Liquids', National Fire Protection Association (NFPA 77, 'Recommended Practice on Static Electricity', and/or the American Petroleum Institute (API) Recommended Practice 2003, 'Protection Against Ignitions Arising Out of Static, Lightning, and Stray Currents'.

**Container Warnings:** Container is not designed to contain pressure. Do not use pressure to empty container or it may rupture with explosive force. Empty containers retain product residue (solid, liquid, and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition. They may explode and cause injury or death. Empty containers should be completely drained, properly closed, and promptly returned to a drum reconditioner or disposed of properly.

Incompatible materials: Strong acids or strong oxidizing agents, such as chlorates, nitrates, peroxides, etc.

## 8. Exposure controls and personal protection

### 8.1. Control parameters

#### Exposure

| CAS No.   | Ingredient        | Source | Value                                    |
|-----------|-------------------|--------|------------------------------------------|
| 8042-47-5 | White Mineral Oil | OSHA   | exposure limits for oil mist are 5 mg/m3 |
|           |                   | ACGIH  | 10 mg/m3                                 |
|           |                   | NIOSH  | No Established Limit                     |

Contains mineral oil. The exposure limits for oil mist are 5 mg/m3 OSHA PEL and 10 mg/m3 ACGIH.

#### Carcinogen Data

| CAS No.   | Ingredient        | Source | Value                    |
|-----------|-------------------|--------|--------------------------|
| 8042-47-5 | White Mineral Oil | OSHA   | Select Carcinogen: No    |
|           |                   | NTP    | Known: No; Suspected: No |

## Safety Data Sheet

### Light Renoil White Oils

SDS Revision Date: 3/24/2015

#### 8.2. Exposure controls

##### Respiratory

If workers are exposed to concentrations above the exposure limit they must use the appropriate, certified respirators.

##### Eyes

No special eye protection is normally required. Where splashing is possible, wear safety glasses with side shields as a good safety practice.

##### Skin

Wear overalls to keep skin contact to a minimum. Nitrile rubber gloves should be worn.

##### Engineering Controls

Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and any vapor below occupational exposure limits suitable respiratory protection must be worn.

##### Other Work Practices

Use good personal hygiene practices. Wash hands before eating, drinking, smoking or using toilet. Promptly remove soiled clothing and wash thoroughly before reuse.

## 9. Physical and chemical properties

|                                                 |                                                                                          |

**Safety Data Sheet**  
**Light Renoil White Oils**  
SDS Revision Date: 3/24/2015

**Pour point**

-40C (-40F) to -12C (10 F)

DMSO extract by IP346: Less than 3.0 wt %

## 10. Stability and reactivity

**10.1. Reactivity**

Hazardous Polymerization will not occur.

**10.2. Chemical stability**

Stable under normal circumstances.

**10.3. Possibility of hazardous reactions**

None known (none expected).

**10.4. Conditions to avoid**

Extended exposure to high temperatures can cause decomposition. Avoid all possible sources of ignition.

**10.5. Incompatible materials**

Strong acids or strong oxidizing agents, such as chlorates, nitrates, peroxides, etc.

**10.6. Hazardous decomposition products**

Not anticipated under conditions of normal use.

## 11. Toxicological information

**Acute toxicity**

## 12. Ecological information

**GHS Classification: No classified hazards**

### 12.1. Toxicity

#### ECOTOXICITY

All acute aquatic toxicity studies on samples of similar oils show acute toxicity values greater than 100mg/l for invertebrates, algae and fish. These tests were carried out on water accommodated fractions and the results are consistent with predicted aquatic toxicity of these substances based on their hydrocarbon compositions. Not classified hazards.

**ENVIRONMENTAL FATE** This material is considered inherently biodegradable. This material is not expected to present any environmental problems other than those associated with oil spills. This material is not readily biodegradable. See Section 6 for Accidental Release Measures.

#### Aquatic Ecotoxicity

| Ingredient                    | 96 hr LC50 fish, mg/l      | 48 hr EC50 crustacea, mg/l | ErC50 algae, mg/l |
|-------------------------------|----------------------------|----------------------------|-------------------|
| White Mineral Oil (8042-47-5) | 5,000, Oncorhynchus mykiss | 1,000, Daphnia magna       | Not Available     |

### 12.2. Persistence and degradability

Persistence per IOPC Fund definition: persistent

### 12.3. Bioaccumulative potential

Not Measured

### 12.4. Mobility in soil

No data available.

**12.5. Results of PBT and vPvB assessment (persistent, bioaccumulative and toxic, very persistent, very bioaccumulative)** This product contains no PBT/vPvB chemicals.

### 12.6. Other adverse effects

None expected

## 13. Disposal considerations

### 13.1. Waste treatment methods

Use material for its intended purpose or recycle if possible. Oil collection services are available for used oil recycling or disposal. Place contaminated materials in containers and dispose of in a manner consistent with applicable regulations. Contact your sales representative or local environmental or health authorities for approved disposal or recycling methods. (See B.C. Reg. GY/92 Waste Management Act; R.R.O. 1990, Reg. 347 General-Waste Management; C.C.S.M.c. W40 The Waste Reduction and Prevention Act; N.S. Reg. 51/95 and N.S. Reg. 179/96 for examples of Provincial legislation.)
