

Dehumidifiers

Command Hub for Dehumidifiers

With Command Hub integrated into your current Dri-Eaz dehumidifier, you will soon have the power and freedom to lead your business from anywhere, using the [Command Center app](#), available in early 2023 for [Apple](#) and [Android](#) devices. Make your business more efficient and profitable with onsite AND remote job management. The Command Hub is available for all current i-Series dehus, including the [Revolution LGR](#), [LGR 6000Li](#), [LGR 7000XLi](#), [LGR 2800i](#) and [LGR 3500i](#). Specific part nos. are provided below.

Features

- **Instant access to critical job data** – onsite on the Command Hub screen or remotely using the Command Center Pro app (available in early 2023).
- **Monitor job trends** – performance graph displays up to 30 data points since the start of the job.
- **Built-in Bluetooth and Wi-Fi** for onsite and remote management of jobs - seamless integration with Command Center Pro app (coming in early 2023).
- **Keep equipment working** - track important maintenance on Command Hub.
- **Achieve ULTIMATE efficiency** - integrates with Next Gear's MICA Mobility app for instant, accurate job data capture.
