

CANTILEVER RACK

The Interlake Mecalux structural cantilever is a medium to heavy-duty storage solution for large, long or irregular shaped loads.

Column "W" Profile – W8" x 18

- Double sided column profile
- 144" high
- 8" foot plate
- 4" adjustable intervals

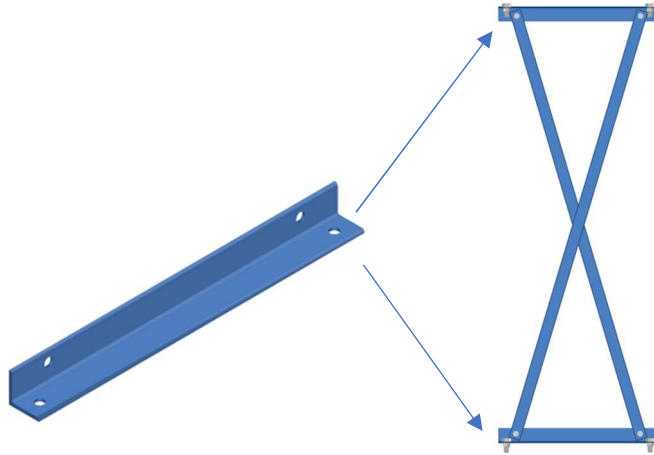

Base "W" Profile – W8" x 18

- 48" base length
- 8.14" high
- 6 bolt connection to column
- 1st load of a cantilever rack system

Arm – "S" Profile – S4

- 48" long – 2-degree slope
- 4" high
- Adjustable in 4" intervals
- 4 bolt connection to column

CANTILEVER RACK

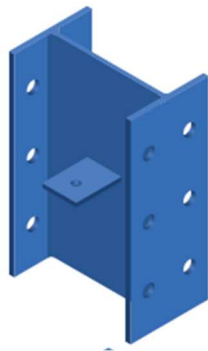

Horizontal Bracing

- "L" Profiles
- Connects all the columns of a row together
- Helps generate "X" bracing to join columns

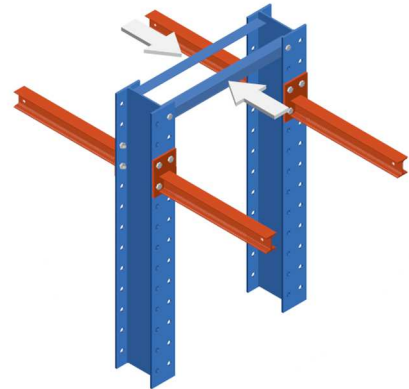

Diagonal "X" Bracing

- Flat braces
- Diagonals connect to horizontal braces

Bracing Clips

Welded clips into column allow horizontal bracing to be connected

Upper Bracing

- "L" Profiles
- Connects at the highest point of the cantilever column
