

FLAV-R-SAVOR® HEATED AIR CURTAINS

Models FSHAC-2, -3, -2PT FSHACH-2, -3, -2PT

The Hatco Flav-R-Savor Heated Air Curtain effectively and safely holds hot food hot without the use of doors, allowing immediate access to product. Warm air at the front of the cabinet is forced downward, through ducts above the opening, forming a "curtain" of heated air. A portion of the heated air is drawn toward the rear through special perforations on the back wall, warming each pan.

FLEXIBILITY

The patented Heated Air Curtain is ideal for holding wrapped product like tortillas, burritos, and ribs, as well as product on sheet pans like biscuits, chicken, hamburger patties, pizza, and baked potatoes. Holding temperatures range from 80°F to 175°F (27°-79°C).

Choose from 2-pan and 3-pan units, single opening or pass-through, with or without humidity. Humidified models can be filled manually or with the auto-fill feature.

The standard units hold half-size sheets pans (one per shelf) and the 2-pan pass-through model accommodates two full size sheet pans.

QUALITY

The following features assure the finest performance for years to come:

- Heated Air Curtain effectively and safely holds hot food hot without the use of doors, allowing immediate access to product.
- 2-pan and 3-pan units available, with or without humidity.
- The standard units hold half-size sheets pans (one per shelf) and the 2-pan pass-through model accommodates two full size sheet pans.
