PART NO. 480001, HEVIMOVER™ MACHINE ROLLER

HeviMovers™ are made with precision ground and hardened steel rollers that form an endless chain around a central load-bearing plate in the frame. Weight of the load is transferred directly from load-bearing plate to floor areas to reduce possible damage to goods. This design eliminates axle friction and requires less power to start and move the load. HeviMovers™ roll easily on most floor areas to reduce possible damage to goods.

- Swivel-top for maximum maneuverability, full 360° rotation.
- Spring-loaded locking mechanism at 45° intervals.
- Only periodic cleaning and light re-oiling of roller chain needed.
