# Nu-Calgon Product Bulletin

- Dries at a controlled rate, leaving no residue
- Dissolves grease and oil in seconds
- Has a dielectric strength greater than 26,000 volts
- Non-corrosive
- Environmentally & Ozone safe

#### **Specialty Aerosol Product**

## **Degreasing Solvent EF**

#### **Description**

Degreasing Solvent EF is a volatile solvent, especially formulated to provide effective cleaning and drying and reduce safety hazards. It leaves surfaces clean and oil-free. The thorough cleaning action is superior to ordinary chlorinated solvents. Its environmentally friendly formulation does not contain any ozone depleting compounds.

#### **Application**

Wearing the appropriate gloves, apply undiluted Degreasing Solvent EF to the surface to be cleaned with a cloth, brush or sprayer. Unusually greasy parts may be soaked in a tank. If necessary, rinse with clean product.

Degreasing Solvent EF is suitable for cleaning electrical and electronic equipment and parts. It will not damage metals, insulating materials, most plastics or rubber under normal use conditions. However, where prolonged contact is necessary, test paints, plastics, and rubber parts for solvent resistance.

Degreasing Solvent EF is useful for service professionals, contractors, equipment manufacturers, all metal working shops and appliance repair shops. It may also be used as a flushing compound in burn-outs or prior to system conversion to HFC's. Consult service tip 3-244 for details.

#### **Properties**

Color Colorless

Specific Gravity 0.977 (8.2 lbs./gal.)

Odor Solvent Foaming None

Solubility Organic solvents

Flash Point 110° T.C.C.

### Packaging

14 oz. can **4083-75** 

Degreasing Solvent LV available for sale into California, Utah and New Hampshire (pt.# 4083-83).

Read and understand the product's label and Safety Data Sheet ("SDS") for precautionary and first aid information.

The SDS is available on the Nu-Calgon website at www. nucalgon.com.
