The Air-Pro™ air curtain is ideal solution for restaurants and food service facilities. Aluminum blower wheels help make this air curtain a light weight, yet highly effective, unit that separates temperatures, ensures employee and customer comfort, and enables workflow to remain constant. The Air-Pro™ helps to substantially reduces utility bills while blocking flying insects and airborne pollutants from entering the controlled environments. A heavy-duty directional vane allows the air to be directed into the area where it can be used most effectively.
