

The powerful and cost-effective way to dry carpets and floors

The Eliminator Pro II offers wet & dry collection in a light and maneuverable single-phase vacuum.

A true wet & dry vacuum, the Eliminator can collect dust or up to 12 gallons of water. Each Eliminator Pro II vacuum comes standard with a cloth main filter, motor filter, and an upstream HEPA. The vacuum is quite easy to service, and even easier to use. An optional 24 inch wide fixed floor nozzle allows the operator to pick up spills quickly and efficiently. The swivel casters, large rear wheels and handle make maneuvering around obstacles or over uneven surfaces painless. When full, the motorhead is simply removed and the 7 gallon cloth dust bag disposed of. If used to collect water, there is a handy drain hose at the rear of the tank that makes emptying extremely easy.

Standard HEPA filtration 50 foot power cord. Upstream HEPA Available 24" wide fixed floor nozzle Quiet operation Easy to use and service 8-foot hose, stainless steel 2-piece extension wand and accessories included.
