

# Aluminum Wheel Chocks

Constructed of extruded lightweight aluminum that is easy to handle. Features a serrated top to grip the tire and a triple edged bottom to grip the ground. Optional handle and sign attachment available. Customer signs available.

**EALUM** - The **Aluminum Wheel Chock** is ideal for the maintenance and industrial facilities. The functional design allows the user to brace the wheels, preventing the unit from moving and jostling. The open construction provides an efficient way of transporting.

(-FYL) chock is powder coated fluorescent yellow for clear visibility.

(-YEL) chock is powder coated yellow and baked in added toughness.

- Extruded aluminum construction is strong yet light-weight
- Open design provides an optional attaching safety chain
- Rugged bottom includes cleats for extra grip
- Serrated top provides extra tire grip
