Notes & Details

The AvaMix BL2VS482J 48 oz. commercial blender with toggle controls and a variable speed dial delivers the power and versatility needed in a blender that will reliably churn out smoothies and frozen cocktails at busy bars or restaurants. With its 2 hp, 1500W motor and heavy-duty stainless steel blade assembly, this blender provides the power you need to crush through ice, to blend mix drinks, smoothies, house-made spreads or salsa, and anything else you can throw at it!

Operating the blender's toggle control panel couldn't be easier. A simple toggle switch with "On" and "Off" settings delivers or cuts power to the blender. The variable speed dial in the center of the control panel gives you the most precise control over the speed of the blender, taking the guesswork out of your drink recipes and making it easy for staff at all levels of experience to operate. And when you need quick bursts of power to finish off a recipe or to clear the blade area, the pulse button provides a quick and convenient way to throttle the unit on high speed.

The 48 oz. BPA-free Eastman Tritan™ jar provides maximum durability and allows the model to handle frequent blending in medium to large volumes. Your blender comes with 2 of them so you can swap out the jar and keep working without having to stop and clean between orders. The 2-piece lid design makes it possible to add ingredients to the blender at any stage in the mixing process, simply by removing the clear inner lid and pushing the additional ingredients down into the jar using the included tamper. A sleek and sturdy ABS plastic base looks great on any bar counter while also making it easy to clean. For added convenience, the jar pad is dishwasher safe, but the jar should be washed by hand for maximum product life. This blender includes a 3 1/2' power cord and requires a 120V electrical connection.
