Features	BPA Free NSF Listed
Horsepower	3 1/2 hp
Jar Type	Stainless Steel Tritan™
Plug Type	NEMA 5-15P
Product Line	AvaMix BX
RPM	26000 RPM
Speeds	Variable
Type	Blenders
Usage	Bar Blending Food and Drink Blending

Notes & Details

This AvaMix BX2000VS 64 oz. commercial blender with toggle controls and adjustable speed combines raw power and maximum simplicity in a blender that can stand up to a busy bar night, but is equally at home in a fast-paced restaurant kitchen! Its 3 1/2 hp motor boasts a whopping 26,000 RPM and 1800W, making it one of the most powerful blenders available in its class - and with a metal drive coupling and blade assembly, it is more than capable of handling ice crushing, drink mixing, smoothies, house-made spreads or salsa, and anything else you can throw at it.

Operation couldn't be simpler, either. A toggle switch powers the blender on and off, while a simple dial control lets you set the blending speed, giving you a nice balance between the simplicity of a pure toggle control blender and the finesse of a model with electronic controls. When you need a quick burst of power to finish off a recipe or clear the blade area, it also has a convenient pulse switch to throttle the unit on "High" speed.

This blender comes with two 64 oz. jars, one made from BPA-free Eastman Tritan™ plastic, and another from stainless steel. Both provide maximum durability in any application, with the Tritan™ plastic jar providing the visibility needed for sight blending, and the stainless steel jar being especially useful when you need to keep hot foods hot, and cold foods cold. A 2-piece lid design lets you add ingredients to the blender at any stage in the mixing process - simply remove the clear center lid and use the included tamper to push the add-ins down into the jar. A sleek and sturdy ABS plastic base looks great on any bar counter while also making it easy to clean. For added convenience the jar pad is dishwasher safe, but the jar should be washed by hand for maximum product life. This blender requires a 120V electrical connection.
