Speeds	Variable
Type	Heavy-Duty

Notes & Details

Make short work of chopping, mixing, or blending jobs right in the bowl or stock pot with this AvaMix IBHD12 12" heavy-duty variable speed immersion blender! Boasting a 12" stainless steel blending shaft that allows you to blend, crush, chop, and puree foods with ease, this heavy-duty blender is a versatile tool that every commercial kitchen needs. Great for soups, sauces, batters, or mousses, this unit has a 1 1/4 hp motor for blending products at up to 18,000 RPM with ease.

To provide the operator with full control, this blender features a variable speed mechanism that allows you to adjust the rate with which you're whipping or emulsifying your products with an easy turn of the dial on the handle. This makes it convenient and user friendly to adjust to the perfect speed while blending your product without any trouble. For user safety, the unit requires two buttons to be pressed to start the unit, but once running the enable button can be released and the unit is controlled just using the power button.

This unit also includes a lock button for convenient, hands-free operation. You can easily adjust the speed of the unit from the handle for a convenient, user-friendly experience. The cooling fans on the housing ensure that this unit will stand up in your commercial kitchen without overheating.

The blending shaft easily detaches from the base so that it can be cleaned and stored efficiently. This also makes it simple to mix and match any size blending shaft or whisk attachment (sold separately) to an AvaMix IB power base. This unit requires a 120V electrical connection for operation.
