Notes & Details

Improve efficiency with this Avantco Equipment countertop radiant electric conveyor oven! Crafted with durable stainless steel housing and heating elements, this oven is built to withstand the demands of busy food service environments. The 14" wide conveyor belt features a variable speed control, allowing you to adjust cooking times to achieve the perfect results for a wide range of dishes. Plus, the adjustable cooking chamber opening helps maintain chamber temperature, providing reliable and consistent cooking results! This ventless unit allows the end user to operate without having to sacrifice valuable hood space.

Enjoy precise control over your cooking process with independent top and bottom variable radiant heat control. This feature ensures that your food is cooked evenly and to perfection every time. Ideal for toasting sandwiches, melting cheese, finishing entrees, and reheating pizza or other pre-cooked food product, this oven is perfect for restaurants, cafes, and pizzerias. With a countertop design, it is a versatile addition to any commercial kitchen seeking to save space and streamline their cooking processes! This unit requires a 208V electrical connection for operation.

This unit should not be used to cook raw food product.
