Notes & Details

Perfectly sized to cook a 12" pizza, the Avantco CO-14 quarter size convection oven is a great way to make baked goods, snacks, warm sandwiches and more right on your countertop. This 0.8 cu. ft. oven boasts 1440 watts of heating power and forced-air heat circulation for even cooking, and can hold up to three, 1/4 size sheet pans at one time. Three chrome wire shelves are included so you can begin baking right away! Plus, cooking temperature can be adjusted up to 500 degrees Fahrenheit. It also features a 120-minute audible timer to help you keep track of your culinary creations, though the timer does not control cooking.

This oven's interior and exterior are fully constructed of heavy duty stainless steel, and the cool-touch dual pane glass door window keeps heat in while preventing operator burns on the exterior side. The powerful convection fan is located at the rear of the unit for efficient heat and air distribution. The Avantco CO-14 requires a 120V electrical connection for operation.
