## Notes & Details

Quickly whip up deliciously cheesy pizzas and other warm snack foods with the Avantco CPO16TSGL stainless steel countertop pizza / snack oven with glass door! Great for snack bars, concession stands, and any place where customers are looking for a snack on the go, this Avantco CPO16TSGL countertop pizza oven makes it easy to add hot pizza to your menu. Boasting interior lighting and a glass door, this oven makes it easy to keep an eye on your food without having to open the door. Two heating elements deliver a total of 1700W and a cooking temperature of 570 degrees Fahrenheit, giving pizzas a crispy crust in only 15-20 minutes. Thanks to a 30 minute timer and an adjustable thermostat, you can set your oven between 150-570 degrees Fahrenheit to perfectly bake each food item on your menu.

Made from stainless steel, this snack oven is durable enough to stand up to the rigors of even high-volume kiosks and snack bars. This also makes the oven easy to clean. Plus, a removable crumb tray is located on the bottom of the unit. This tray catches crumbs as they fall off the product during baking, and makes it easy to remove them during routine oven cleaning. This unit sits on non-skid feet to help keep it in place on countertops and work stations.

This oven comes with a wire baking rack to easily load and unload frozen pizzas. The cool-touch handle allows your staff to safely remove freshly baked pizzas from the oven. This oven also accommodates 1/8 or 1/4 size sheet pans for other ready-to-eat snacks. This oven has a 3" tall opening for the wire product rack, and it is wide enough to accommodate a 16" pizza perfectly. Add this pizza / snack oven to your establishment and expand your menu offerings! This unit requires a 120V electrical connection for operation.
