Plug Type	NEMA 5-15P
Power Type	Electric
RPM	178, 293, 576 RPM
Speeds	3 Speed
Style	Lift
Timer	Without Timer
Transmission Type	Gear-Driven
Type	Stand Mixers
Usage	Standard Duty

Notes & Details

The Avantco MX10WFB 10 qt. gear-driven commercial planetary mixer is perfect for standard duty mixing tasks at your deli or cafe! This 10 qt. mixer features a powerful 3-speed, 3/4 hp motor to ensure consistent mixing, even when the bowl is full. The 3 speeds let you mix anything from cake batter to whipped cream, and they are labeled to indicate which attachment is best-suited for that setting. A gear-driven transmission design provides greater reliability than belt-driven mixers. Plus, this unit includes a #12 hub and a 30-minute timer for optimal convenience.

This unit comes fully equipped with a type 304 stainless steel mixing bowl to provide greater longevity over comparable models. A wire bowl guard helps to prevent fingers and objects from getting caught in the mixer during use, which maximizes safety in a hasty kitchen environment. Plus, a stainless steel whip, cast aluminum dough hook, and 2 flat beaters come with this mixer, too, so you can create all of your guests' favorite dishes with ease. One of the flat beaters comes with a silicone scraper blade, so you'll be able to scrape the sides of your bowl as you mix, leaving nothing to waste and making clean up an easier task when finished. For added safety, this mixer will not operate when the bowl guard is opened or when the bowl is lowered. A 120V electrical connection is required for operation. Only the stand mixer holds the ETL certification.
