Notes & Details

Cook up hearty portions of rice for your authentic Mexican restaurant, Asian bistro, or on-the-go sushi counter with this Avantco RCSA60 60 cup (30 cup raw) sealed electric rice cooker / warmer! Boasting 1550W of cooking power, this unit is capable of preparing up to 60 cups of cooked rice in 50 minutes or less. This rice cooker is designed to meet the demands of your busy operation. The rice cooker automatically switches from cooking to warming mode once cooking is complete, so you can be sure that your freshly cooked rice stays at the perfect temperature for your guests. The easy-to-use control panel features a user-friendly switch with indicator lights to show whether the cooker is in cook or warm mode. This cooker allows you to keep the ready-made rice at an ideal serving temperature for up to 12 hours! Plus, its tightly sealed hinged lid locks into place and has a button release. The lid locks in the perfect amount of moisture and retains heat for maximum cooking to ensure perfectly cooked rice every time. The lid is vented to let steam escape while a built-in condensate collector traps excess water to keep the unit clean and dry.

Featuring dent-resistant, stainless steel construction, this rice cooker offers long-lasting durability and easy cleaning while looking sleek and sharp on the countertop. A removable non-stick aluminum interior pot is ideal for cooking your rice evenly, and its non-stick coating makes serving and cleaning the pot a breeze. The lid features a carry handle that can make moving the unit even easier. The included clear measuring cup provides quick, accurate portioning of dry rice into the pot, and the rice paddle allows you to efficiently mix, scoop, and serve your rice while preserving its consistency. A 120V electrical connection is required for operation.
