Notes & Details

Make kielbasa, chorizo, bratwurst, and other mouthwatering meats with this Avantco sausage stuffer! This vertical unit delivers a reliable performance while taking up minimal counter space. It includes 5/8", 7/8", 1 1/4", and 1 1/2" stainless steel funnels, allowing you to make snack sticks, sausage, and luncheon meats without needing to buy any additional accessories. The 4 sizes of funnels accept nearly any size of collagen, fibrous, and natural casings to make your special dishes.

This sausage stuffer has enclosed steel gears that turn with 2 speed options, allowing you to easily attach the handle to a fast- or slow-turning shaft. This combines with a pressure relief valve to offer precise control over your product's consistency. The design of the handle and gears gives you greater leverage and makes turning and stuffing sausage easier than ever. This model's all-metal drive gears and piston rod are made to deliver the pressure needed to stuff both big and small sausages. Plus, the gasket completely seals the cylinder to prevent any meat or air leaks that would compromise the perfect sausage.

This unit is made with type 201 stainless steel sides and a removable type 304 stainless steel tilt-out canister for long-lasting durability and simple cleaning. It features large rubber feet and a heavy base to help prevent rocking during use. Add this rugged sausage stuffer to your commercial kitchen or butcher shop to expand your sausage selection!
