Notes & Details

The Avantco W800 11 qt. stainless steel round warmer boasts 800W of power to provide fast, even heating that is certain to get the best out of your most delicious soups, stews, or sauces! Excellent for use in buffets, concession stands, cafeterias and more, this countertop warmer has a thermostatic control with 6 heat settings to give you excellent control over the unit's operating temperature. A stainless steel housing and interior lining give this unit a sleek appearance and help ensure consistent, long-lasting performance, while an 11 qt. stainless steel inset is also included for added convenience. The dishwasher-safe inset features a reliable hinged cover that helps retain heat and allows for easy product access without the possibility of misplacement. And, since the cover is notched, it accommodates a ladle for convenient storage.

The Avantco W800 11 qt. countertop warmer requires a 120V electrical connection. Temperature range is 105-195 degrees Fahrenheit.
