## Plan View

INSTALLATION NOTE: ALLOW 6" SPACE AT LEFT, BACK, AND RIGHT SIDES FOR VENTILATION AND UTILITY CONNECTIONS

## Notes & Details

Make sure you've always got plenty of fresh ice on hand and easily accessible with the KMC-420-H2F 22" air cooled modular full cube ice machine with dispenser! Capable of producing up to 399 lb. of full cube ice per day, you'll always have plenty of ice to serve on demand at your hotel, bar, or cafe. An included ice dispenser holds up to 120 lb. of ice and features a deep sink to accommodate hotel ice buckets of almost any size.

For ease of maintenance, a built-in diagnostic system will identify problems that your ice machine may be having and will display the issue on the digital controller so it can be repaired accordingly. This easy-to-use controller can also be used to monitor the current stage of ice production that your machine is in. It allows you to adjust the bridge thickness up or down to maximize your harvest into individual cubes of ice, rather than full sheets. It also initiates the cleaning cycle and displays what stage of the cycle you're in. Plus, the ice dispenser has a 3/4 FTP drain fitting.

Constructed of durable type 304 stainless steel with a polyethylene interior, this unit is built to last in the busiest commercial environments. A nickel plated evaporator and removable air filter make for quick and simple cleaning and maintenance. With (4) 6" adjustable legs, you can level your machine on uneven surfaces and have plenty of room to clean under it. This ice machine also comes with pre-drilled holes on the back of the unit to mount your OceanLoch+ water filter to the machine to ensure you are serving the cleanest and freshest ice possible. Designed for side-breathing and rear exhaust, you can avoid hot air being blown outward into your kitchen or service area. This unit requires a 115V electrical connection for operation.
