| Water Temperature Range | 40 - 90 Degrees F         |
| Water Usage             | 22.8 Gallons Per 100 lbs. |

## Plan View

## Notes & Details

Make sure you've always got plenty of fresh ice on hand with the Avantco Ice UC-120-A 19" air cooled undercounter full cube ice machine! Capable of producing up to 129 lb. of full cube ice per day, these narrow foot print undercounters are great for the tight space needs of busy restaurants, bars or cafes. The narrow foot print design is great for saving on space and includes an 40 lb. bin to hold ice once it is made.

For ease of maintenance, a built in diagnostic system will identify problems that your ice machine may be having and will display the issue on the digital controller so it can be repaired accordingly. This easy-to-use controller can also be used to monitor the current stage of ice production that your machine is in. It allows you to adjust the bridge thickness up or down to maximize your harvest into individual cubes of ice, rather than full sheets. It also initiates the cleaning cycle and displays what stage of the cycle you're in. Constructed of durable type 304 stainless steel with a polyethylene interior, this unit is built to last in the busiest commercial environments. A nickel plated evaporator and removable air filter make for quick and simple cleaning and maintenance. With 4 adjustable legs, you can level your machine on uneven surfaces and have plenty of room to clean under it. This ice machine also comes with pre-drilled holes on the back of the unit to mount your OceanLoch+ water filter to the machine to ensure you are serving the cleanest and freshest ice possible. This unit requires a 115V electrical connection for operation.
