Notes & Details

Make food preparation as convenient as possible with this Avantco VersaHub WiFi-enabled worktop refrigerator. With a spacious stainless steel worktop surface for slicing, dicing, assembling, mixing, and other food prep tasks, the unit features a 3 1/2" backsplash for wall protection and a refrigerated storage space below. The refrigerated portion is readily accessible through the doors, which open up to two epoxy-coated shelves to help you organize your ingredients and best utilize the spacious interior. Plus, because they accommodate up to 88 lb. each, the shelves are well equipped for holding heavy bulk ingredients, from fresh produce to sauces, glazes, and other specialty condiments and garnishes. This model uses the VersaHub platform to provide live notifications, history, and other WiFi-enabled updates.

The need for extra clearance is eliminated due to the convenient front-breathing design, which allows the back and sides of the unit to be placed directly against a wall. This design provides exceptional airflow and helps to save space in your establishment. The self-closing and stay-open solid doors allow users to load the unit quickly and easily after a delivery, while the recessed door handles and magnetic door gaskets further expedite the loading process. Plus, the bright LED interior lighting allows users to find what they're looking for with ease.

This corrosion-resistant unit is designed for outstanding durability to ensure that it withstands tough, busy kitchen environments. It features a 430 type stainless steel exterior, which provides both strength and a smooth, sleek appearance. The interior, made with 304 type stainless steel, also offers the durability necessary for heavy, regular use. This unit includes casters for easy mobility.

This worktop refrigerator ensures optimal performance by operating with a 1/7 hp refrigeration system that circulates R-290 hydrocarbon refrigerant to maintain temperatures from 33 to 40 degrees Fahrenheit. R-290 refrigerant has an ozone depletion potential (ODP) of 0 and a global warming potential (GWP) of 3. The foamed-in-place polyurethane insulation helps to retain cold temperatures, which ensures that all food held in the unit remains at food safe temperatures and ready for preparation or direct service to customers!

Operation of the refrigerator is easy, thanks to its special features. Monitor it by consulting the interior wall-mounted thermometer, and use the auto-defrost feature on the pre-programmed digital controller to maintain the refrigerator in tip-top shape. The controller's audible alarms alert you to temperatures too high or low, extended door opening, and to clean the unit's condenser. This worktop unit requires a 115V electrical connection for operation.
