Phase	1 Phase
Voltage	115 Volts
Access Type	Doors
Capacity	20.8 cu. ft.
Color	Black
Compressor Location	Bottom Mounted
Construction	Stainless Steel
Display Case Type	Open Air Refrigerated
Door Style	Sliding
Door Type	Glass
Features	Digital Temperature Controller LED Lighting
Glass Style	Curved
Horsepower	1 hp
Included	Night Cover
Installation Type	Freestanding
Number of Doors	2 Doors
Number of Shelves	2 Shelves
Plug Type	NEMA 5-15P
Refrigerant Type	R-290
Service Type	Dual Service
Style	Combo Horizontal
Temperature Range	33 - 40 Degrees F
Type	Merchandisers

Notes & Details

Attractively present your fresh baked goods with this Avantco CAC-60 59 1/8" black curved dual service refrigerated open display merchandiser. This contemporary case keeps contents sanitary while beautifully displaying them on durable glass shelves. Having a dual service open air merchandiser is sure to boost your impulse sales, because customers can clearly see the products you're offering behind the strong glass front, or select products of their choosing from the bottom open air part of the unit. It features bright, cool LED lighting to show off your products on the included adjustable glass shelves. The versatile top section can be adjusted to hold product at room temperature, refrigerated temperature, or can even be independently adjusted to hold product and accommodate both temperatures at the same time.

For outstanding durability, this sleek black merchandiser is made of durable stainless steel, both inside and out. The sliding door on the top part of the dual unit protects food from becoming stale, but also provides easy access to products so your staff can quickly serve your guests. The front curved glass is anti-fogging and allows for maximum visibility for merchandising food and drinks. Giving you the best of both worlds, this unit's open-air design is perfect for adding last minute upsell drinks or packaged foods to a customer's order, while the merchandiser allows for sanitary service of a variety of food items.

The digital temperature controller ensures quick temperature readability, and for convenience, the unit has an auto defrost function so your staff won't need to set aside valuable time to schedule a defrost. A 1 hp compressor keeps the unit operating at appropriate temperatures, while circulating R-290 refrigerant. This unit's specialized refrigerant has an ozone depletion potential (ODP) of 0 and a global warming potential (GWP) of 3. This unit comes with a 7 3/8' long power cord and requires a 115V electrical connection for operation.
