Voltage	115 Volts
Cabinet Type	Merchandising
Capacity	10.25 cu. ft.
Color	White
Compressor Location	Bottom Mounted
Container Display Capacity	9 Pans
Door Style	Sliding
Door Type	Glass
Features	Customizable Digital Temperature Controller LED Lighting Lockable Lid With Sneeze Guard
Front Style	Flat
Horsepower	2/5 hp
Plug Type	NEMA 5-15P
Refrigerant Type	R-290
Temperature Range	-15 - 15 Degrees F
Type	Gelato Cabinets

Notes & Details

Display, merchandise, and serve a delicious variety of gelato flavors with this Avantco ADC-GEL-9F curved glass gelato dipping cabinet! Featuring a racking system designed to fit the included (9) 5 liter pans, this unit is perfect for ice cream shops, candy stores, dessert bars, and cafeterias. It's capable of serving ice cream, gelato, sorbet, and acai. The frozen storage space beneath the display even provides a convenient place for holding back-up pans, making it a space-efficient unit for businesses with limited space.

Outfitted with a flat-front sneeze guard, the dipping cabinet is perfect for front-of-house applications. Not only does the sneeze guard prevent customers from contaminating the product, but it ensures crystal-clear visibility for merchandising purposes. By showcasing bright, fruity, or dark chocolatey flavors behind the glass, you tempt customers into trying a bite - or a few!

A sliding cover also protects your product while helping to retain cold air around the product for a safe holding environment. Because it slides open and closed, it's fast and easy to use, too, which is perfect for those busy rush hours or constant streams of customers in the summer months! The cover also comes equipped with a lid lock to ensure that your ice cream remains protected and temperature controlled. This dipping cabinet also features a white, curved front design with a painted steel construction. Plus, it has LED lighting to help light and show off your products!

Featuring a digital controller to maintain temperatures from -15 to 15 degrees Fahrenheit, this cabinet ensures that your gelato is held in a proper environment to preserve its quality and consistency. To help achieve this, the robust, bottom-mounted compressor uses R-290 refrigerant. This specialized refrigerant has an ozone depletion potential (ODP) of 0 and a global warming potential (GWP) of 3, making it a regulation compliant choice for your business. Plus, for maximum structural rigidity and temperature retention, the cabinet is foamed-in place using cyclopentane insulation. It requires a 115V electrical connection for operation.
