

## #914DGIT1000A

Project: \_\_\_\_\_

Approval: \_\_\_\_\_ Date: \_\_\_\_\_

- Measures temperatures from -58 to 968 degrees Fahrenheit or -50 to 520 degrees Celsius
- 12:1 distance to spot ratio, 0.95 emissivity rate, and 0.2 degrees Fahrenheit resolution
- Ergonomic gun-style design with easy-to-use trigger
- Large, backlit LCD display that can hold readings
- Included AAA batteries

Width	1 1/2 Inches
Depth	3 1/2 Inches
Height	6 1/2 Inches
Display Type	Digital
Distance to Spot Ratio	12:1
Emissivity	0.949999988079071 Emissivity
Features	Automatic Shutoff Backlight Max Function
Infrared Accuracy	+/- 4 Degrees Fahrenheit

Technical Data		
Maximum Temperature		968 Degrees F
Minimum Temperature		-58 Degrees F
Resolution		0.2 Degrees
Response Time		1 Seconds
Style		Handheld
Temperature Reading		Celsius Fahrenheit
Type		Infrared Thermometers Thermometers

## Notes & Details

There's no doubt that the AvaTemp digital laser infrared thermometer is the ultimate tool when it comes to properly measuring food temperatures. Measuring temperatures from -58 to 968 degrees Fahrenheit or -50 to 520 degrees Celsius with an accuracy of +/- 4 degrees Fahrenheit, this versatile thermometer provides all the information you need within 1 second. Its 12:1 distance to spot ratio means that it doesn't need to come in contact with the food itself, making your establishment even more hygienic. Plus, with a 0.95 emissivity rate and 0.2 degrees Fahrenheit resolution, the accuracy of this thermometer is incomparable.

For comfortability, this thermometer features an ergonomic gun-style design with an easy-to-use trigger. Not to mention, with 2 included AAA batteries, you'll be ready to go on day one. To use, simply point and pull the trigger to get an accurate temperature reading. Its large, backlit LCD display provides clear information, and it can even hold the temperature reading by temporarily freezing the display screen. After 30 seconds, the thermometer automatically shuts off for energy efficiency, and the thermometer also indicates when it's low on battery life.

AvaTemp provides a thermometer to fit virtually every need in your kitchen. Pocket probe thermometers come in both digital and dial readouts and specialty products range from meat probes to refrigerator / freezer thermometers. These and the color-coded HACCP options help keep your business in compliance with safe cooking and holding temperatures. For reliability in the kitchen, AvaTemp delivers easy-to-use and cost effective food safety solutions.
