Notes & Details

Keep an eye on the temperature in your refrigerator or freezer with this AvaTemp digital refrigerator / freezer thermometer with high / low sensing. A digital LCD display shows the current, minimum, and maximum temperatures, allowing you to easily monitor your unit to make sure it's running properly. With a temperature range of 258 to -58 degrees Fahrenheit, this thermometer is suitable for use in refrigerators and freezers. It displays temperature in Fahrenheit or Celsius to meet your needs.

Ensure your refrigerator or freezer is held and maintained at the proper temperature to ensure food safety with this thermometer. It's perfect for use in wine fridges, cellars, deep freezers, and walk-ins. With a clip and a back magnet, this thermometer can be affixed to the sides of your unit or hung from shelves to accommodate your workflow.
