## Notes & Details

When accepting or shipping deliveries, use this AvaWeigh BS150T 150 lb. digital receiving bench scale to load your shipments and confirm package weight. It features a stainless steel 15 3/4" x 11 13/16" platform with plenty of space for all sizes of boxes and product. The platform is low to the floor to make it easy for staff to load heaving boxes, making the work safer and more efficient. This unit also includes a 26" tall tower with an easy-to-read, 1" tall LCD display that is adjustable at the base to angle the display at your convenience. This display is backlit and shows 6 digits at a time, which allows for more precise and visible readings in any type of lighting. Plus, it includes both USB and RS232 ports for easy record keeping.

Functions aren't just limited to the necessities like weighing and tare, either. It includes part counting and accumulation functions. While each function enhances convenience, it also makes the scale more versatile. Part counting allows staff to easily count the amount of items based on weight, and accumulation remembers and saves previous weight amounts to allow staff to easily add together the total weight of larger objects that won't fit on the scale at the same time. This provides an accurate reading on your shipments. Its ability to read in multiple units, including pounds, kilograms, and ounces, also ensures that it's useful in every situation. From the receiving area to the back-of-house to the mail room, this scale offers great features to keep your operation on the right track.

A steel construction and ABS housing indicator provide durability as well, while the adjustable feet ensure the platform is always level. A level platform is important when weighing objects that might otherwise roll or slide. A 12V AC adapter is included to power the scale, though it can also run on its 6V rechargeable battery for wireless operation.
