Material	Steel

Technical Data	
Increments	0.05 Kilograms 0.1 Pounds
Plug Type	NEMA 5-15P
Power Type	Battery Electric
Style	Dual Reading
Туре	Floor Scale with Tower

Notes & Details

When accepting or shipping deliveries, use this AvaWeigh FS500TW 500 lb. digital receiving scale to load your shipments and confirm package weight. It features a mild steel $21\,11/16$ " x $16\,9/16$ " platform with plenty of space for boxes and product of all sizes. It also includes a $29\,1/2$ " tall tower with an easy-to-read, 1" tall LCD display that is adjustable at the base to angle the display at your convenience. This display is backlit and shows 6 digits at a time, which allows for more precise and visible readings in any type of lighting. Plus, it includes both USB and RS232 ports for easy record keeping.

Functions aren't just limited to the necessities like weighing and tare, either. It includes part counting and accumulation functions. While each function enhances convenience, it also makes the scale more versatile. Part counting allows staff to easily count the amount of items based on weight, and accumulation remembers and saves previous weight amounts to allow staff to easily add together the total weight of larger objects that won't fit on the scale at the same time. This provides an accurate reading on your shipments. Its ability to read in multiple units, including pounds, kilograms, and ounces, also ensures that it's useful in every situation. From the receiving area to the back-of-house or mail room, this scale offers great features to keep your operation on the right track.

A steel construction provides durability while back wheels and a handlebar make it easy to move when weighing heavy objects. This scale is built tough with a steel construction that provides durability to make sure it holds up in any commercial or industrial environment. Heavy-duty back wheels and a handlebar provide effortless mobility and unmatched versatility for when you need to move the scale to another area of your business. Move this scale to your heavy shipment instead of the other way around! A 12V AC adapter is included to power the scale, though it can also run on its 6V rechargeable battery for wireless operation.

Readout Measurements:

500 lb. x 0.1 lb. 250 kg x 0.05 kg
