Features	Automatic Shutoff NSF Listed Tare Waterproof / Washdown
Increments	0.05 Ounces 0.1 Ounces 1 Grams
Power Type	Battery Electric
Style	Dual Reading
Type	Portion Control Scales
Usage	Weighing

Notes & Details

Create consistently portioned servings effortlessly with this AvaWeigh Platinum waterproof stainless steel digital portion control scale. Made of durable stainless steel, this scale has a removable platform for easy cleanup, and it helps to reduce waste in your establishment by ensuring that expensive ingredients are not overused. It features an IP68 rating for resistance to dust and dirt, which keeps fine ingredients like spices or salt from damaging the scale. Plus, the waterproof design resists water for up to 60 minutes, making it well-suited for busy commercial kitchens and food service applications.

This scale is equipped with an LCD screen that displays weight in units of pounds, ounces, grams, and kilograms, as well as a comparison of pounds to ounces. It features a simple 4-button touch pad with buttons for power, set, tare, and unit settings. When configured to target a specifically consistent weight, the background of the LCD screen will change colors, and a chime will sound to provide a visual and audio cues that weight is not optimal. It also has a hold function that freezes the display for 10 seconds, allowing you to accurately record measurements.

The extra large platform provides ample space to hold a variety of items, and it has a raised lip to keep drips or spills from running down onto the scale. The unit will alert users of instability that can impact accuracy. After use, simply wipe down the platform or remove it for additional cleaning or scrubbing. This versatile scale can be powered with the included adapter or a rechargeable battery. When used with the battery, an automatic shut-off mode will turn off the scale after 2 minutes of inactivity to preserve battery life.

Readout Measurements:

- 22 lb. x 0.01 oz.
- 352 oz. x 0.05 oz.
- 10 kg x 1 g
- 10,000 g x 1 g
