Notes & Details

Make it easy to portion product thanks to this AvaWeigh PCS40T 40 lb. digital price computing scale with tower, legal for trade. Ideal for delis, bakeries, and supermarkets, this AvaWeigh digital price computing scale is a fast, affordable, and accurate way to portion your most popular items for sale! The tower attachment makes it easy for employees and customers to read information with a quick glance. Great for frequent use in your commercial business, this scale is built to withstand your busy environment. It features a sturdy ABS plastic body and long-lasting stainless steel weighing plate. Featuring easy-to-read LCD display screens with a convenient backlight on both sides of the eye-level height tower, this scale is easy for both employees and customers to view while in use.

Weighing food products is a breeze with this unit's robust 75-key keyboard operating system, print, and save keys. Measuring items in 0.01 lb. increments, this scale can weigh items up to 40 lb., making it versatile for use in your business. The stainless steel platform provides a large space for weighing a variety of items and is easy to clean and maintain. This scale's system is capable of memorizing an item's name, life, ingredient, tare weight, and price, and can store up to 265 PLUs. It comes with an AC adapter and rechargeable batteries for efficient operation. The scale has a RS-232 data port and USB port allowing it to easily connect with a OS-2130D printer or computer.

For added convenience, this scale comes with a thermal label printer intended for quickly producing a barcode label for your product, streamlining your operation for efficiency and speed. Using your label printer will make it easy for customers to check out or see details such as pricing, weight, date, and more. Ideal for low- to moderate- printing intensity, this printer can handle all of your shop's or restaurant's needs. To get you started right away, the printer comes with power cords and a RS-232 cable for scale connection. It can print from 3/16" to 100" in length and 1" to 2 13/16" in width. It prints using heat, so ink is never required for use.
