Style	Dual Reading
Type	Platform Scales

## Notes & Details

Utilize this Avaweigh RS400 400 lb. digital receiving scale to ensure you're receiving the proper product amounts at your restaurant, hotel, or business. This unit is durable, with a 12" x 12", stainless steel platform and welded steel supports underneath the platform for guaranteed sturdiness. This scale is equipped to stand up to wear and tear in any commercial or industrial environment. The unit has a corrosion-resistant aluminum indicator, which utilizes a clear 3/4" LCD display, intuitive controls, and a mounting bracket. The indicator comes with an RS232 and USB port for added versatility. A 9' coiled cable allows you to place the indicator where it's most convenient. The scale has the ability to weigh items in either pounds, pounds and ounces, or kilograms.

The Avaweigh RS400 receiving scale possesses the capability to weigh, hold, and tare, which deducts container weight and zeroes out for multiple ingredient measurement, making it adaptable to all of your potential weighing needs. It also has auto shut-off, which conserves battery power, a low battery indicator mode to prevent unexpected power loss, and an overload indicator to prevent damage to the scale. The Avaweigh RS400 includes adjustable feet and steel supports underneath the platform to level your scale on any surface. The scale uses (4) "AAA" batteries (sold separately) or an AC adapter (included).
