## Notes & Details

Quickly boil an entire bag of crawfish with this Backyard Pro 160 qt. liquid propane cajun seafood boiler! With a large 160 qt. pot, this model is perfectly sized to accommodate up to 90 lb. of crawfish at one time! It's also great for boiling corn, red potatoes, andouille sausage, and other Louisiana staples. Or use this seafood boiler to cook your clams, mussels, lobsters, shrimp, or even peanuts. The boiler uses powerful burners to reach boiling temperatures so you can finish up a load of food in as little as 30 minutes.

For added safety and convenience, a hinged rotating basket design allows you to easily pour your food down the sturdy hinged lid and into a cooler or serving container, eliminating the need to lift a heavy basket out of a stockpot while it drains. A side shelf offers space to keep go-to spices within reach, while a stirring paddle is also included that conveniently stores along the side of the unit. The boiler is made for the outdoors and comes equipped with sturdy wheels to make it easy to move to your location. The boiler and basket are made out of aluminum 1060 and the base is made out of cold rolled steel. Whether you are outfitting an outdoor cooking area at your seafood restaurant or getting ready for summer catering and carnivals, this boiler is a great choice. A liquid propane connection is required for operation.
