Features

- Create your signature burger and sausage specials by combining meat, vegetables, and spices
- Non-slip rubber feet prevent sliding and offer stability during quick meat mixing
- Clear plexiglass top allows visibility, with small cutout for space to incorporate ingredients
- Removable paddle and metal gears are both durable and easy to clean
- Reliable stainless steel countertop design – 44 lb. / 7 gallon capacity

Notes & Details

Rather than spending several hours hand-mixing possibly hundreds of pounds worth of meat, utilize this Backyard Pro Butcher Series manual meat mixer to drastically speed up the process and increase the efficiency of your kitchen's food prep. Mix meats, vegetables and much more together efficiently with this Backyard Pro Butcher Series 44 lb. meat mixer. With a simple to use crank that rotates the paddles inside, this mixer will ensure that herbs and spices are mixed consistently throughout your meat products.

A clear plexiglass top lets you closely monitor the progress of your mixing, and a small cutout on the cover allows herbs and spices to be added while mixing. Rubber feet prevent any unwanted movement while operating the mixer and alternatively, the unit can be surface mounted for even more stability (hardware sold separately). For ease of cleaning, the interior paddles are completely removable. The gears attached to the crank are made of durable metal and are long lasting and ideal for heavy use.
