Horsepower	1 hp
Installation Type	Countertop
Plug Type	NEMA 5-15P
Power Type	Electric
Usage	Light Duty

Notes & Details

Prepare meat efficiently and easily with the help of this Backyard Pro Butcher Series 65" blade countertop vertical band meat saw. Boasting a razor sharp, 65" long blade with 4 teeth per inch and 1 hp motor, this vertical band saw can cut through all kinds of meat for perfect portioning and presentation in your butcher shop or deli. The aluminum chassis and head keep the motor protected while the stainless steel worktable is durable and easy to wipe clean each time after use.

Designed with your convenience in mind, this blade has a cutting speed of 3011 ft. per minute so you can work quickly. With max cutting dimensions of 8 1/4" x 7 1/16", this countertop meat saw can handle thicker portions of meat with ease. For optimal results, use it to cut fresh meat and bones. If you're looking to cut frozen meat, be sure to use a blade for cutting frozen meat (sold separately), and make sure the blade is adjusted and set in the proper position. An adjustable fence allows the operator to get consistent cut portions of meat every time, so no guessing is required.

To ensure the safety of your staff, consider also having them wear cut-resistant gloves (sold separately) as an extra precaution when using this saw. This saw features an open chassis safety shut off switch if the saw is opened while turned on, ensuring safe use for inspection or while replacing the blades. The blade guard also protects users from cutting themselves accidentally and features an extra-long side handle to safely open the guard while the saw is turning on, in use, or shutting down.

Best of all, since this is a countertop saw unit, it won't take up as much space in your establishment in comparison to an alternative floor model. Plus, it can be wiped at the end of the night to keep it clean or taken apart for a special deep cleaning. This unit requires a 110V electrical connection for operation. Plus, as a part of the Butcher Series from Backyard Pro, this model is built to provide you with a reliable use so you can make sure your customers are served the very best each time.
