- Light-duty design is ideal for occasional, short-term use, such as casual outings
- Carrying bag included for simple storage and transportation

Technical Data

Shape	Square
Style	Straight Leg
Type	Canopies

Notes & Details

This Backyard Pro Courtyard Series instant pop-up canopy tent offers affordability, portability, and quick setup, allowing you to tackle your next event with ease! Its light-duty design is ideal for occasional, short-term use, such as providing shade for volunteers, flea market events, casual outings, temporary outdoor displays, and non-residential team sporting events. The top fits snugly over the frame for a seamless look and easy setup.

Crafted from water-resistant 100% polyester fabric, this canopy offers protection for your guests, equipment, and employees during light to moderate rain. It even features a UV-resistant coating to guard against harmful UV rays. Perfect for outdoor events, it provides up to 100 sq. ft. of shade beneath its 10' x 10' canopy. The powder-coated steel frame and bright white canopy top combine to ensure longevity and optimum visibility, near or far.

This Backyard Pro canopy features a rising truss ceiling system that combines the benefits of the full truss system's strength with reinforced truss bars, offering additional headroom similar to a cathedral-style frame. Plus, the 4-legged design ensures stability no matter the setting! For convenient transport to and from locations, a carrying bag is included with this product.

For added convenience, this canopy is simple to set up; it only takes a few minutes with the work of two employees to complete! Simply place the frame on its feet, and then begin pulling the legs out while still keeping the top of the frame at a reachable level. Once the frame is partly expanded, add the cover on top with each corner fitting over a leg. Continue to pull the legs in opposite directions until they're out as far as they will go and lock into place. Finally, raise the height of each leg by lifting the upper portion, stopping when each leg locks into place. Tear down is just as easy. All you need to do is remove the top, adjust the legs back to their lowest height, disengage each corner's locking button, and gently push together until the frame is once again folded fully.
