

BROADBAND PRO

COMBINES SONIC & ULTRASONIC TECHNOLOGY

The BroadBand PRO 4-speaker system is our only system that simultaneously emits sonic and ultrasonic sounds to confuse, disorient and intimidate pest birds, keeping them away. Each speaker includes 100 ft. of wire for more coverage. Ultrasonic sounds are inaudible to humans but highly irritating to birds and other pests. Sonic sounds include an unrelenting combination of species-specific distress calls, danger alerts and predator calls that condition pest birds to stay away. The combination of sonic and ultrasonic sounds make the area seem threatening to pest birds and will deter them from the treated area. The BroadBand PRO is fully programmable and users are able to control volume, sound delays, and day/night operation.

Pests: birds (pigeons, crows, blackbirds, grackles, sparrows, seagulls, starlings, swallows), bats, rodents

Applications: warehouses, manufacturing facilities, parking lots, garages, sheds, storage buildings, waterfront property, docks

Specifications

Coverage	Ultrasonic: Up to 900 sq. ft. per speaker (3,600 sq. ft. total), Sonic: Up to 6 acres
Power Requirements	110vAC (220vAC available)
Dimensions	Control Unit 9" x 9" x 5", Speakers 4" x 4" x 6"
Weight	10 lbs
Speakers	8 ohms, 30 watts
Sound Pressure	Ultrasonic sounds 95-102 dB (each speaker) at 1 meter Sonic 105-110 dB (each speaker) at 1 meter
Frequency	Ultrasonic 15-25 KHz, Sonic 3-5 KHz
Compliance	Supply power source is UL and CE listed. EPA Est. 075130-OR-001.
SKU	BB-PRO-B
Origin	Assembled in the USA
