Features	Heated Spout Merchandiser
Installation Type	Countertop
Material	Stainless Steel
Number of Compartments	2 Compartments
Power Type	Electric
Style	Dispenser Warmer
Temperature Control	Adjustable

Notes & Details

An excellent addition to concession stands, buffet lines, and other foodservice operations, this Carnival King double warmer is designed to keep your most popular toppings or condiments hot and ready to serve! Whether you're serving nacho cheese, hot fudge, chili, or another of your favorite hot toppings, this warmer is sure to please. This unit features 2 independently controlled wells, allowing you to serve 2 different products simultaneously. It even includes 2 pumps with heated spouts for an added performance boost.

This warmer accepts #10 cans and can fit up to a 3.5 qt. inset or select bain marie pots (sold separately). This way, you can simply drop your canned items directly into the warmer or, if your food comes bagged or in an otherwise different packaging, fill a bain marie. The ergonomic pumps make dispensing a breeze while the heated spouts ensure that your toppings come out piping hot from start to finish. They also help you control portions better than serving with a ladle by delivering the same amount of product with each pump.

This warmer comes with 7 decals for simple product identification, including hot fudge, nacho cheese, and hot chili. The decals slide in and out so that you can easily use your own custom decal or serve different toppings out of the same warmer. With a manual temperature control for each well and an on/off toggle switch, this machine couldn't be any easier to operate! Each temperature control has 7 settings, and the switch illuminates when powered on for added convenience. The unit's stainless steel construction helps to ensure long-lasting performance and rests atop 4 rubber feet that keep it securely in place during use. A 120V electrical connection is required for operation.
