Carnival King 382PD5G172 Fan Motor for RBD3G2, RBD3G3, and RBD5G2 Refrigerated Beverage Dispensers - 110V

Item #382PD5G172

Technical Data

Type

Refrigeration Parts

Features

- Direct replacement for original part
- Compatible with RBD3G2, RBD3G3, and RBD5G2 refrigerated beverage dispensers (sold separately)
- Keeps dispenser operational by preventing the compressor from overheating
- 110V
- Definite purpose motor for the listed use and application

Notes & Details

This Carnival King 382PD5G172 fan motor is a direct replacement for the one that comes standard on RBD3G2, RBD3G3, and RBD5G2 refrigerated beverage dispensers (sold separately). The fan is an important part of your unit's refrigeration system, as it blows air over the compressor during operation, preventing it from overheating. If the fan motor is damaged or not working, it's important to replace it promptly, as failure to do so could lead to damage or premature failure in other components. This fan motor requires an 110V electrical connection for operation.
