Material	Polyethylene
Pan Capacity	2 Pans
Product Line	CaterGator
Shape	Rectangle
Style	Single
Type	Combo Kits Food Pan Carriers

Notes & Details

Perfect for catering and take-out operations, this CaterGator black top loading 6" deep insulated food pan carrier with Vigor plastic full size 4" deep food pan and seal lid delivers the durability and the stability your food needs to arrive intact and at the proper temperature. This set includes a food pan carrier along with a full size 4" deep food pan and cover. The carrier features a top loading design for ease of loading, allowing you to simply place pans directly down into the carrier and lift them out upon delivery. Made of durable polyethylene, the carrier easily withstands regular use, transport, and exposure to high heat. Since this carrier is insulated with polyurethane foam insulation, it helps maintain the proper temperature prior to delivery, keeping hot food hot or cold food cold for up to 7 hours. In order to increase the temperature retention time beyond the standard 7 hours, the carrier can be pre-chilled or pre-heated. Simply pre-chill the unit with its lid open in a walk-in refrigerator or freezer for about 30 minutes prior to use. To preheat, load a hotel pan of hot water into the carrier, and close the lid for about 20 minutes. In transit, the lid's four latches tightly clasp shut to close and lock, preventing it from opening en route to the customer and compromising the temperature. When carrying the unit by hand, a recessed groove around the carrier allows the user to grab it from any angle. After use, the unit stacks with other sizes, such as 4" and 8" deep CaterGator top loaders and other similar carriers from other brands.

The included 4" deep pan can be used to prep, store, transport, and serve food items. The polycarbonate material is virtually unbreakable and resistant to food acids and oils, helping to extend the life of this food pan. It can also withstand temperatures ranging from -40 to 212 degrees Fahrenheit so that it can be used in various storage locations. It is also freezer-safe. Thanks to the clear material, this food pan offers optimum visibility for quick product identification. The reinforced top and bottom corners are also resistant to bending, cracking, and denting. Included capacity indicators allow you to quickly and easily do inventory management and measure out how much you need of any product. A spoonable bottom makes removing contents easier, reducing food waste. This pan even includes stacking lugs so that you can keep all your food pans together and maximize your storage space. It includes a compatible lid to eliminate the risk of contaminants. The unique seal of this lid protects against spills, and the durable polyethylene construction withstands repeated kitchen and catering use with the ability to withstand temperatures between -40 and 18- degrees Fahrenheit. Perfect for transporting foods to offsite locations, this lid is BPA-free and keeps food fresher longer.

Set Includes:

- (1) CaterGator black front loading insulated food pan carrier
- (1) Vigor full size clear polycarbonate food pan
- (1) Vigor full size gray secure sealing polyethylene food pan cover
