Product Line	CaterGator Dash
Style	Single
Type	Food Pan Carriers

Notes & Details

Designed for transport, the CaterGator Dash front loading insulated food pan carrier provides the versatility and quality you need to safely deliver pans of food. It holds up to (5) 2 1/2" deep food pans and can accommodate various combinations of full, 1/2, and 1/3 size pans that are 2 1/2", 4", and 6" deep. It will work with most types of pans as well, including foil, plastic, and even stainless steel.

Because the carrier is made with expanded polypropylene (EPP), it offers superior temperature retention and maintains hot or cold food temperatures for up to 4 hours. If you need a longer hold time, you can use the CaterGator Dash Hot Board or CaterGator Dash Ice Board (sold separately) to extend your food holding time even further.

This insulated pan carrier features a professional grade construction made from expanded polypropylene (EPP), an insulated material with a high level of durability. This high-tech material is extremely lightweight and offers excellent impact-, water-, and chemical-resistance. Not only a durable and lightweight option, this carrier is an eco-friendly choice for your business. It includes a large latch that quickly and securely locks the door to retain temperature. The door even extends to a full 270 degrees for easy access to your food pans, and is completely removable for easy cleaning.

For convenient transport, the unit features handy grip edges on all 4 sides that are both durable and ergonomic. This design allows the carrier to stack with similar carriers and simplify storage.

Delivering quality products at a fair price, CaterGator is the ideal serving solution for catering businesses, hotels, food trucks, and concession stands. Upgrade your catering services with this insulated food pan carrier!
