Cooking Performance Group 351200900019 6" - 7" Adjustable Legs for FFOP40 and FFOP50 Fryers

Notes & Details

These Cooking Performance Group 351200900019 adjustable legs are a direct replacement for the ones that came standard with your Cooking Performance Group FFOP40 or FFOP50 fryers. These legs are adjustable in height between 6" and 7" to account for uneven flooring in your kitchen and are essential for providing stability to your unit. Its stainless steel construction ensures your fryer is fully supported while giving you enough clearance to regularly clean beneath your unit. Replace a worn or damaged leg right away so that your fryer rests at the height that is suitable for you.
