Style	Standard
Top Configuration	Open Burners
Total BTU	132000 BTU
Type	Countertop Ranges
Usage	Medium Duty

Notes & Details

Boasting six powerful 22,000 BTU burners with standing pilots for instant ignition, this Cooking Performance Group HP636 range with an open cabinet base gives you the high-performance cooking solution you need to quickly and easily prepare sauces, sides, entrees, and more! The heavy-duty cast iron cooking grates are oriented in a flat alignment so that you can easily slide pots and pans from one burner to the next without worrying about spills, and they also help protect the burners against clogs resulting from overflow.

This range features an all stainless steel construction to ensure long-lasting durability and easy cleaning, while a full width waste tray also helps expedite end-of-day cleaning. It has a 3/4" rear gas connection and ships ready to connect to a natural gas supply, but includes a liquid propane orifice kit for simple field conversion.

The stainless steel cabinet base has an open storage area, perfect for holding commonly used range accessories like hot pads, cooking utensils, food pans, and more. It also comes with (4) 6" legs so that you can easily clean the floor underneath. The base holds the range at the perfect working height without using up valuable counter space. Perfect for applications that need an economical, high-output range but don't have the space for a countertop unit, this range and base combo unit provides the cooking power you need in a standalone design.
