

COMPOSITE LAMINATE

PORTABLE DANCE FLOOR

Indoor/Outdoor, All-Purpose Laminate Dance Floor

A brand activation for 1,000, an estate wedding, or an outdoor charity gala; no matter the location our laminate-top dance floors are the perfect solution for providing an attractive and stable dance surface. These high-quality panels are water-, scratch- and weather-resistant and are so durable that they can last for years.

The CPDF Composite Laminate dance floor is available in four colors: New England Plank (a rich, wood color), Black and White. The running plank pattern of the New England Plank offers the upscale appearance of wood, but with the practicality and affordability of laminate. The black and white color options offer versatility for a variety of functions and occasions. An all-white dance floor is perfect for weddings. Or, create a black-and-white checkered dance floor for maximum drama!

With the exterior grade, moisture resistant, 3/4" plywood base, and its pressure treated composite laminate top, this is one of the most durable floors available. These sections also have a resin coated backing for extra protection from the elements. Make sure the dancing lasts all night with a CPDF Composite Laminate dance floor!

FEATURES AND BENEFITS

- Extremely durable and resilient; it's the perfect choice for outdoor events and high traffic events.
- Scratch-resistant surface provides an attractive dance floor.
- Active connection system prevents panels from pulling apart up, down, or sideways.

Simple to Use

As with our entire line of CPDF dance floors, our Composite Laminate panel uses a unique, tongue-and-groove connection system which is simply pressed together and then screwed in place to form a secure, seamless connection between panels. These panels are designed to create an even, stable dance surface over unprepared or uneven ground indoors and out.
